

Commodore Computers Bloom with CP/M[®], Hard Disk and Multi-User Capability.

Now your Commodore can blossom into a full-blown CP/M-based or multi-user business system with the addition of one of these innovative peripherals. Your Commodore plus the SOFTBOX gives you a single-user CP/M system. Commodore plus HARDBOX puts Pet software on Corvus Disk Drives and multiplexing units.

RUN CP/M WITH SOFTBOX ON FLOPPY AND HARD DISK.

Add SOFTBOX. The Z80-based computer which connects to your Commodore PET or CBM through the IEEE bus.

Now you have the ability to run any CP/M software or application, giving you a universe of computing capabilities you could only wish for until now.

Simply by plugging the SMALL SYSTEMS SOFTBOX into your Commodore Computer's IEEE-488 port and loading the CP/M disk, your computer will run under the world's most popular disk operating system. No internal connections or modifications to your computer are necessary.

Applications packages designed to work with specific terminals (like Lear Siegler ADM3A, Televideo 912 or Hazeltine 1500) need no modification to work with your computer's screen, since the SOFTBOX allows your computer to emulate any of these devices.

Interfaces that come with your SOFTBOX let you add the Corvus Hard Disk and any RS-232C peripheral. You can run a printer, and even talk to another CP/M based system.

90-Day Warranty. Suggested retail \$895
Complete line of CP/M software available.

COMMODORE DEALERS

Expand your customer base by including the vast range of CP/M software development and applications!

Small Systems Engineering provides everything you need to enter the CP/M marketplace. Excellent dealer margins. Advertising and marketing support. CP/M software on Commodore formats. Corvus products. Watch for innovative products from SSE to support your Commodore Computer line.

HARDBOX GIVES PET DOS MULTI-USER AND HARD DISK CAPABILITY.

The HardBox introduces your PET software to the world of high-capacity, high speed disk storage. It acts as an intelligent controller for up to four Corvus Winchester disk drives. Each Corvus drive can have a capacity of 6, 10 or 20 million bytes.

The HardBox is designed to be software-compatible with PET DOS version 1 or 2, so that it will work with existing programs. The HardBox is designed to appear to the PET as a fast, high-capacity floppy disk unit.

When used with the Corvus range of drives, the HardBox provides much more than just a hard disk interface. By using an 8-way multiplexing unit, up to eight PET users, each equipped with a HardBox, may simultaneously address the same hard disk. By using two levels of multiplexing, up to 64 users may be accommodated. The hard disk may be divided logically into user areas.

A comprehensive set of utility programs are provided with the hardbox for file transfer, hard disk configuration, mirror backup, system maintenance etc.

90-Day Warranty. Suggested retail \$695.
