

# SOFTBOX<sup>®</sup> unlocks the world of proven business software to COMMODORE users.

Simply by plugging the Small Systems SOFTBOX into the IEEE-488 port and loading the CP/M disk, your Commodore PET/CBM will run under the world's most popular disk operating system. No internal connections or modifications are required.

A complete computer system in itself, the SOFTBOX uses the PET or CBM as its terminal while talking to any combination of Commodore and Corvus drives. A single command returns you to PET BASIC. The SOFTBOX utility disk gives you complete software control over your configuration.

### Terminal Emulation

Applications packages designed to work with specific terminals (like ADM3A, TVI 912 or Hazeltine 1500) will need no modification for the 80-column CBM, since the SOFTBOX allows your com-

puter to emulate any of these devices.

### Add Corvus Hard Disk

Expand your CP/M file storage capacity with reliable Corvus drives. With the Corvus Mirror Option and a standard video cassette recorder, you have a fast, inexpensive disk backup. When you purchase the SOFTBOX and Corvus from Small Systems, you'll receive everything necessary to convert your Commodore to a hard disk-based CP/M system.

### Features

- CP/M version 2.2 with menu driven system configuration.
- Z80 CPU running a 4MHz with no wait states.
- 64K RAM.
- Operates with any 2000, 3000, 4000

and 8000 series Commodore computer.

- Supports up to 8 Commodore 3040, 4040, or 8050 disk drives.
- Supports up to 4 Corvus hard disks of 6, 11, or 20 MBytes.
- RS232 serial interface with software-definable baud rates for use with a printer, modem or terminal.
- Diskette containing operating system with utilities.
- Comprehensive user manual.

A full range of CP/M languages and applications software on Commodore 8050 or 4040 format is available.
